Knowledge Translation Workshop

Getting Evidence into Practice: Steps to Success

This highly interactive and outcome focused workshop will take the mystery out of getting evidence into everyday practice. If you are a doctor, nurse, allied health professional or manager grappling with ever increasing change in your day job, then take a breather and come and see how you can develop new skills and knowledge to improve your chances of success.

The workshop is also highly relevant to PhD, Post-Doctoral, health service research and implementation science researchers working with health systems to introduce new models of care and service improvements.

Led by an internationally renowned team of KT researchers and practicing clinicians from South Australia and Queensland the program will offer new insights and a series of practical tools and techniques. It will also give you an active and vibrant network of like-minded health professionals who will stay connected on future journeys.
